## Trimming our language

※ Example : Emergence of dietary problems related to environmental pollution around the world

As a result, the value of green ocean is eco-friendly market (친환경 시장)

receiving attention, focusing on the development of sustainable resource utilization rather than maximizing corporate profit generation.

※ Example : In the eco-friendly market, blue foods that not only have nutritional seafood(수산 식품)

value but also emit relatively low greenhouse gases are sold.

They say they will provide a sustainable eating environment through this.
